

Redux
Store

Slices

function.

dispatch (of)

22/01/25

Install:

npm i @reduxjs/toolkit react-redux

↓
Library

Package
Connect

react components
to Redux.

Install:

Router

npm i react-router-dom

<Router>

<Link>

<Routes>

<Route path>

</Routes>

</Router>

Example

↳ home
↳ users
↳ about
↳ contact

} → Create Router
and two labels

2 folder under Src.

app → Store
slices. → Slices.

Slices

↳ userslice.js
* create slice

app

↳ store.js.

* Configure store.

* Use one name for
userslice file.

And,

userinfo: UserReducer

Key for reducers and
UserReducers is the name
we gave.

Use Selector

~~UseCollector.~~

Users.js

Add useSelector.
